HVAC Service Technician

Description

CSE is seeking HVAC Service Technicians for our New Cumberland office to provide preventive maintenance and repairs for commercial and industrial HVAC systems. We are seeking a motivated, customer service oriented Technician to provide our customers with maintenance, repair, and possibly installation of commercial/industrial HVAC equipment by identifying and troubleshooting issues and recommending the necessary repairs.

Controls, Service & Engineering Co., Inc. (CSE), a family owned and operated business for over 40 years, is Central PA's best kept secret in the HVAC/Plumbing industry. CSE provides high quality service and installations to the top industrial, medical & commercial buildings in the area. Our cultural norms include:

- Above and beyond
- Choose your attitude
- Open communication
- Intentionally build connection
- Own it
- Improve and grow/always pursue better
- I show gratitude... practice generosity...and apply grace!

If our Cultural Norms speak to you and you meet at least our minimum requirements, we would love to have a conversation and learn more about how you may be our next HVAC Service Technician!

Responsibilities

- Identify, troubleshoot and repair problems in various types of commercial and industrial heating and air conditioning systems.
- Order and install replacement parts as required.
- PM, repair, replace, or calibrate controls, thermostats, switches, fuses, and electrical wiring.
- PM, repair, replace, or calibrate components on air conditioners, heat pumps and gas fired heating systems.
- Fabricate, assemble, and install electrical wiring, controls, and piping as required.
- Wire and connect motors, pumps, compressors, temperature controls, heating elements, and humidity controls as required.
- Provide proper refrigerant handling procedures according to federal EPA guidelines.
- Be available for on-call schedule four to six times per year.
- Promote a positive work environment and company culture.

Qualifications

- High school diploma or GED.
- Strong mechanical aptitude.
- Associate's degree or certification in HVAC (preferred).
